

# iSee Youth Help Foster Youth Transition with Confidence, Connections, and Support

**EASTBANC**  
TECHNOLOGIES

Too often, foster youth leave the system without the support they need to transition into adulthood, resulting in homelessness, unemployment, substance abuse, and other risk factors.

While the resources exist to help them assume adult responsibilities, information overload and short attention spans make it challenging to cut through the noise. Likewise, young adults may not have the necessary social

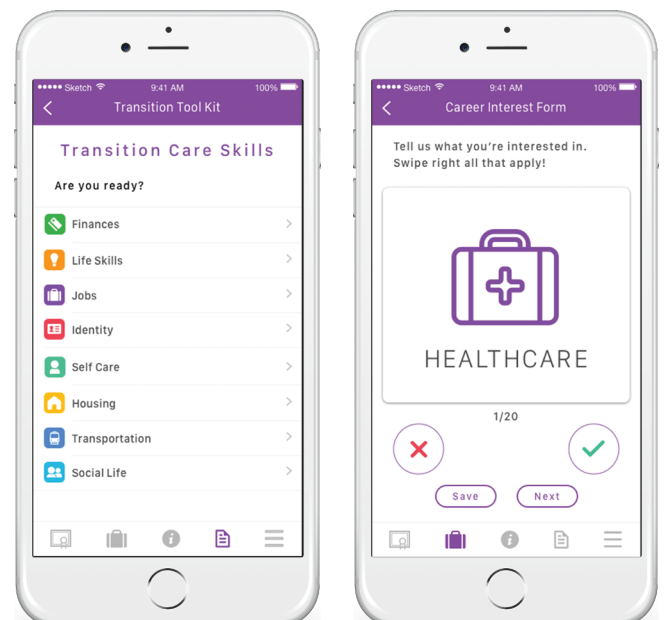

network to guide them through processes such as finding the right scholarship program, applying for a driver's license, or even filing their taxes.

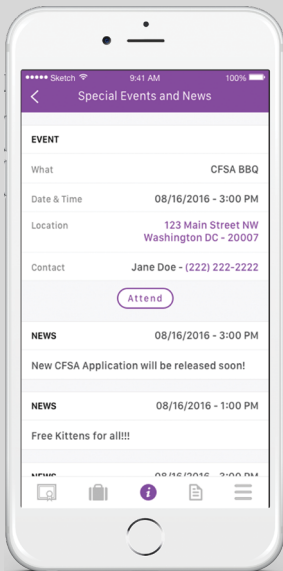

To combat these challenges, EastBanc Technologies developed iSee Youth. Based on the powerful iSee platform, this mobile application cuts through the barriers and connects foster youth to the critical support and social networks they need to thrive into adulthood.

## Helping Foster Youth Transition to Adulthood – At the Swipe of a Finger

Cool, fun, and easy-to-use, iSee Youth gives current and former foster youth access to a lifeline of tools, resources, and support.

An essential guide to adulthood, the app helps youth quickly and easily find information that empowers them to make their own decisions and take responsibility for their actions. No need to search public websites or sift through transition binders, the app integrates it all in one interface, that's always up-to-date. With easy-to-follow explanations, suggestions, checklists and one-click links, the app is a go-to resource for transitioning foster youth.

## Features include:

**Quick Access to Information for Life Outside Foster Care** – Young adults can quickly and easily find jobs and job-readiness training near them, search for available housing, learn how to set up a bank account, register for self-development events, and get alerts about upcoming medical/job appointments.

**Essential Personal Data is Fingertips Away** – Kids don't want to carry important information on their person. We developed iSee so that users can securely store and access information such as birth certificates, Medicaid, and even transit smartcard data – right from their smartphone.

**Tools that Youths Love** – Providing the right information is critical, but how you deliver that content is just as important to today's youth. iSee is designed with ease-of-use in mind. Features such as map-based views of nearby services/jobs/housing, etc., upcoming appointment reminders, easy-to-digest checklists, and more give kids complete access right at their fingertips. We've even eliminated the boredom of form-filling by designing resources, such as career interest or program enrollment forms, in a click/swipe format.

**One-Click Access to Support and Advocates** – As foster youth adjust to adulthood, iSee helps them maintain a direct line to social workers and advocates. With one-click access to a help line and an instant messaging feature, help is only a swipe away.

**Share Experiences with Other Youth** – Life outside foster care can be scary, confusing, and lonely. Peer groups can be an invaluable lifeline for foster youth. With iSee, kids can message and share experiences with other foster kids, within the privacy of the app.
